

Navigate360 Visitor & Volunteer Management

INCREASE SECURITY & REDUCE FRONT-OFFICE WORKLOAD
WITH OUR FRICTIONLESS, FLEXIBLE VISITOR AND
VOLUNTEER MANAGEMENT PLATFORM FOR SCHOOLS

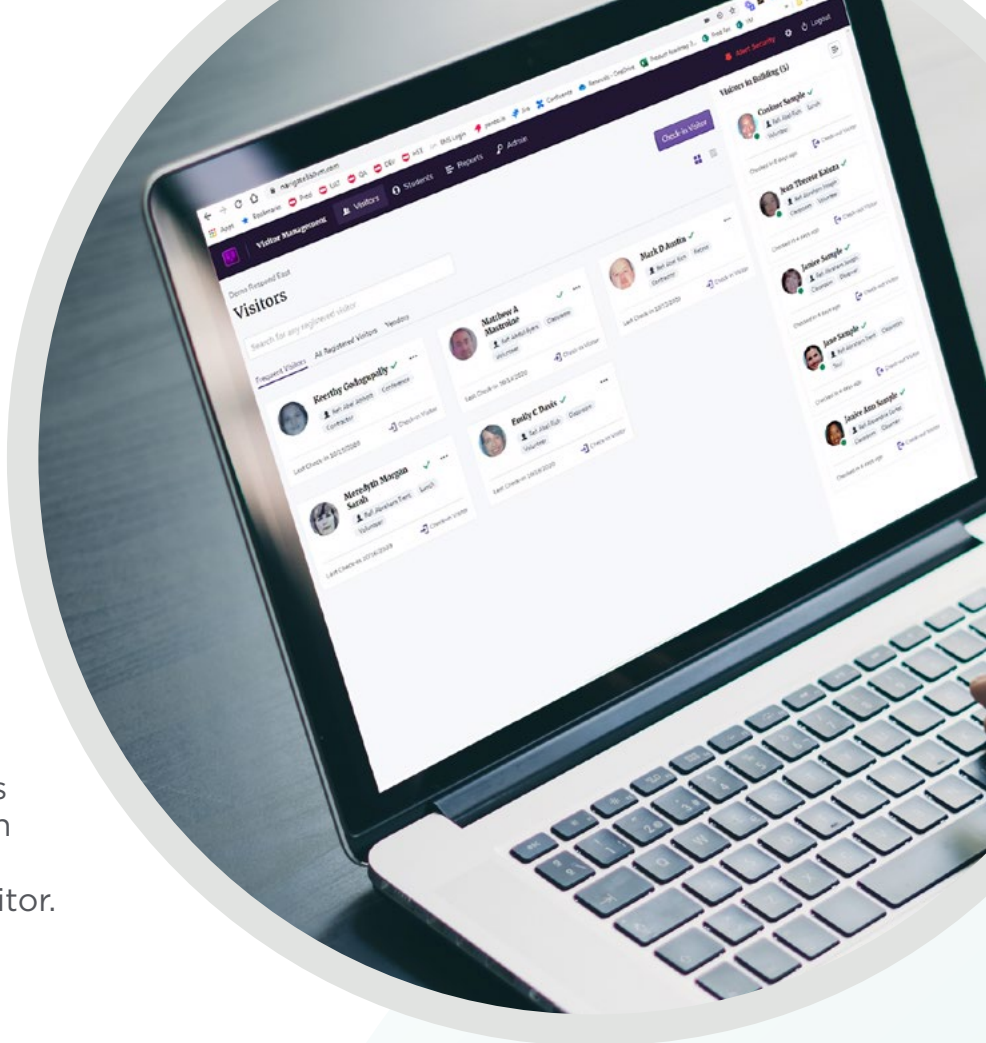

Navigate360

Building safer tomorrows.™

Navigate360 Visitor Management

The Navigate360 Visitor Management platform allows school administrators to keep their students and staff safe, their front office efficient, hardware downtime to a minimum, all while making their school community feel welcome. Our streamlined platform increases security and reduces the disruption of visitor check-in by securely and discretely vetting each campus visitor.

Safer Schools

Vet those who don't belong in your building and gain access to real-time visibility of everyone in your building at any time, including during an emergency when details count.

Streamline Efficiency

Register visitors in just a few clicks, including recording tardy students and printing passes while eliminating manual processes and handwritten passes to keep things moving.

Hardware Light

Cloud-based software with no proprietary hardware required allows for easy, flexible, budget-friendly and efficient implementation and use.

Ensure Safety & Visibility

ALWAYS KNOW WHO IS ON YOUR CAMPUS

- **Control Visitation**
Create custom blocklists, custody instructions, and restrictions with other types of visitation rules for those who pose a risk to staff or students.
- **Screen Every Visitor**
Every visitor is vetted through the sex offender database and your custom blocklist on each visit with discretion.
- **Stay on Top of Custody**
Maintain and access custody instructions at your fingertips through SIS integration.
- **Notify Security Discreetly**
If a visitor is flagged, your security team is subtly notified via text or email without alarming the visitor.
- **Maintain Visibility**
Constant, real-time visibility of visitor dashboard so you always know who is in your buildings and why they are there.
- **Contact Trace**
Reduce infectious disease exposure risk, including COVID-19, in your buildings and promptly facilitate contact tracing, if needed.
- **Customize Badges**
Control information on visitor badges with flexibility to include a picture on each visitor pass with a scan of their driver's license or via webcam.

Increase Efficiency

CONTINUE TO WELCOME THE COMMUNITY INTO YOUR SCHOOL WITH LESS PAPERWORK & MORE EFFICIENCY

An easy check-in process for both the front office staff and visitors while maintaining a welcoming environment and increasing security.

Easy Implementation

The Navigate360 Visitor Management platform is quick to implement and requires minimal onboarding so your front office staff can be up and running swiftly and smoothly.

Seamless Integration

SIS integration with Clever, ClassLink, and PowerSchool ensures you always have the most updated information, including custody instructions, at your fingertips.

Cloud-Based Platform

Cloud-based software accessible from any computer or through an installed app on mobile and tablet devices allows school staff to access and run the system by simply logging in.

Customizable System

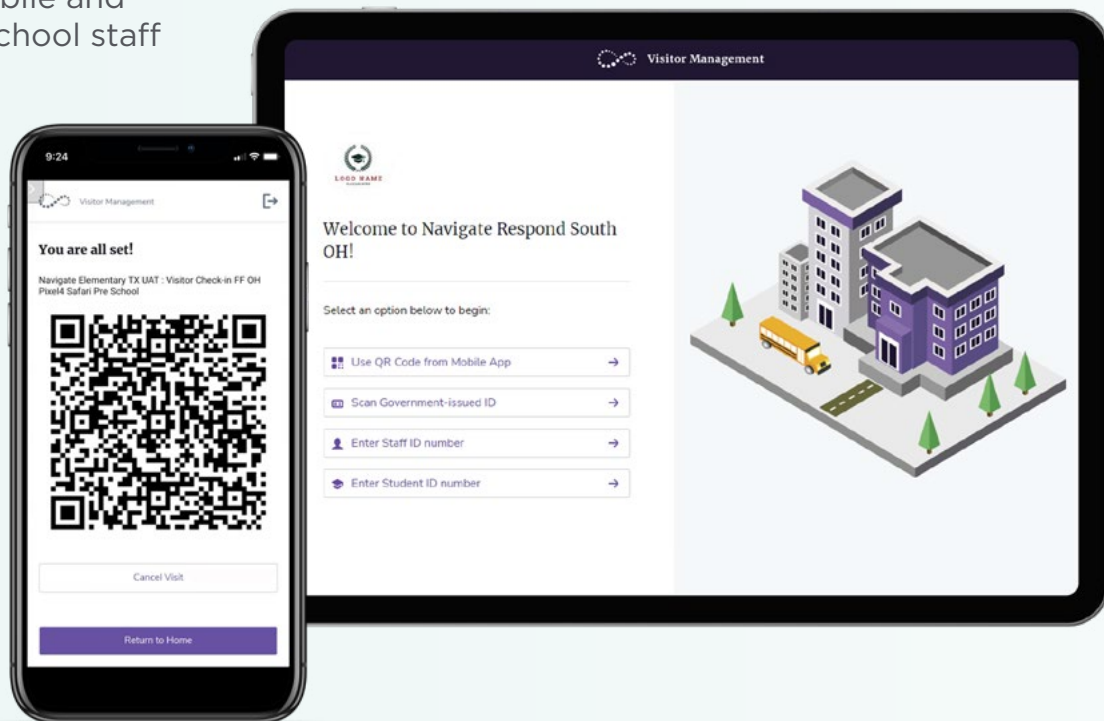

Visitor Management that is completely flexible to your needs. Create custom blocklists, run only the reports you need, and have access to unlimited check-in stations.

Student Check-In & Early Release

Manage student tardies and early release directly in the system to reduce paperwork and manual processes and writeback the information with PowerSchool SIS integration.

Self Service Check-In

Visitors can easily check-in using an app – either on their phone or at a station in the front office. Frequent visitors can quickly scan and go. Once the system vets their information, their badge is printed, and the visitor is on their way while reducing unnecessary contact exposure.

Optimize Hardware

A HARDWARE-LIGHT SYSTEM THAT'S RIGHT FOR YOU

Navigate360's Visitor Management offers light and flexible hardware options, allowing you to quickly implement an easy and efficient check-in/check-out process that is right for your school and for your budget.

Build Your Own Hardware Bundles

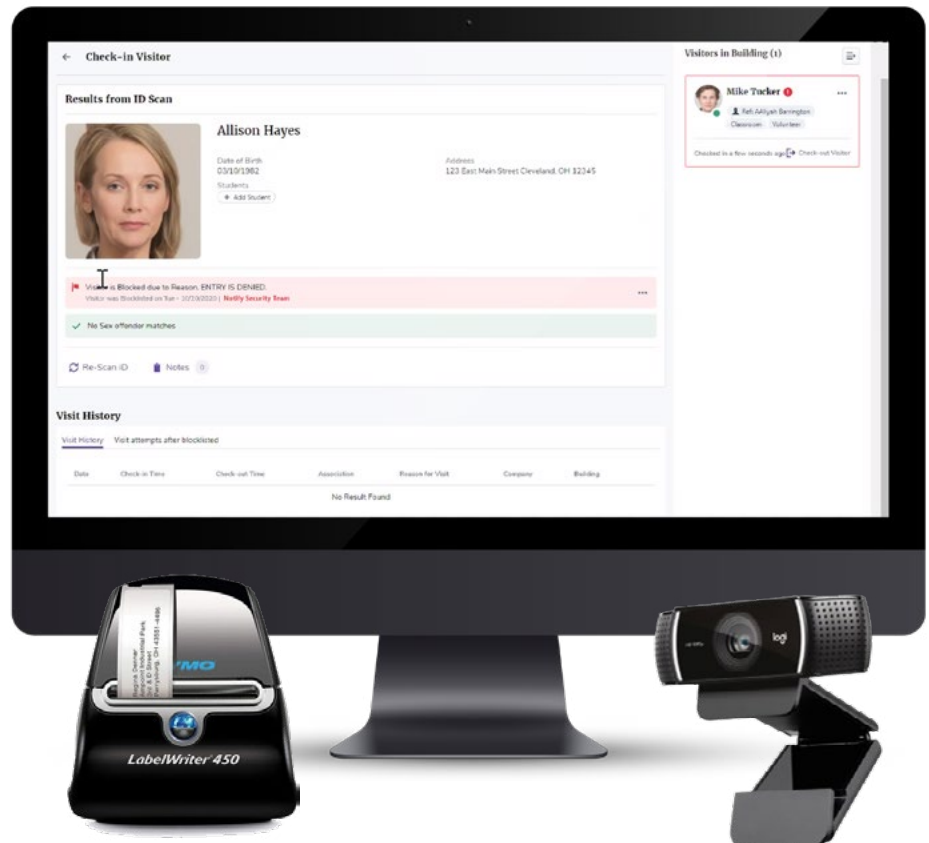

Select the hardware that best meets your needs – with no hardware required to complete the check-in process. The system can be run in a browser from any computer. Schools can also choose to use webcams, license scanners and printers for badges to streamline the Visitor Management process even further.

Reduced Hardware Costs

Less hardware means fewer failure points and easy maintenance over time. We offer webcams, license scanners and label printers, but you may be able to integrate with the hardware you already have – none of the hardware is proprietary.

Multiple Check-In Stations – No Extra Costs

Being hardware-light also means you can have as many secure check-in points as you like at no additional subscription cost.

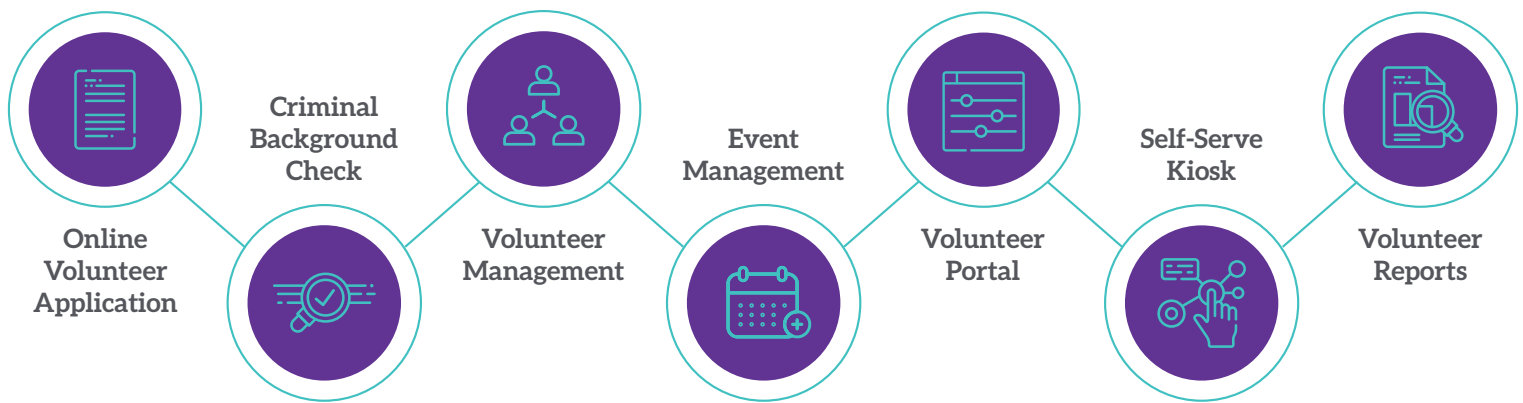

Leverage Your Existing Hardware

Navigate360's Visitor Management may be compatible with your existing visitor management hardware and your school tablets for self-check-in stations. Contact a representative to learn if your specific hardware works with our system.

Navigate 360 Volunteer Management

Navigate360's Volunteer Management provides complete visibility of those individuals who are applying to become volunteers. Review sex offender and criminal background checks and leverage a real-time virtual calendar of events to manage volunteer opportunities and the number of people needed for each event.

Improve Visibility & Efficiency

Easy check-in/check-out minimizes front-office congestion and expedites office workflows with kiosk stations.

24/7 Access

Provide caregivers online access to volunteer applications that include approval and denial options for school intake staff.

Verify & Submit

Applicants will be prompted by a legal disclaimer that can be edited and customized by district administration.

Personalize Welcome Messages

Applicants are greeted by a fully customizable welcome message once they access the online volunteer portal.

Event Sign-Up

Create and manage a calendar of events for volunteer sign-up through the portal.

Hours of Service

View each volunteer's hours of service, patterns and events or run a comprehensive report.

Online Security

Navigate360 uses Google reCAPTCHA to protect districts against spam.

The platform allows districts to:

About Navigate360

Navigate360 empowers people, schools and communities to stay safe and thrive – physically, socially and emotionally.

The Industry's Best Modern Practices

Navigate360 is the leader in holistic safety and wellness solutions. Our revolutionary model spans the full spectrum of safety, including threat detection and prevention, mental health and wellness, and safety management and preparedness – backed by research and developed by industry experts. We provide the tools necessary to save and enhance lives.

Why Navigate360?

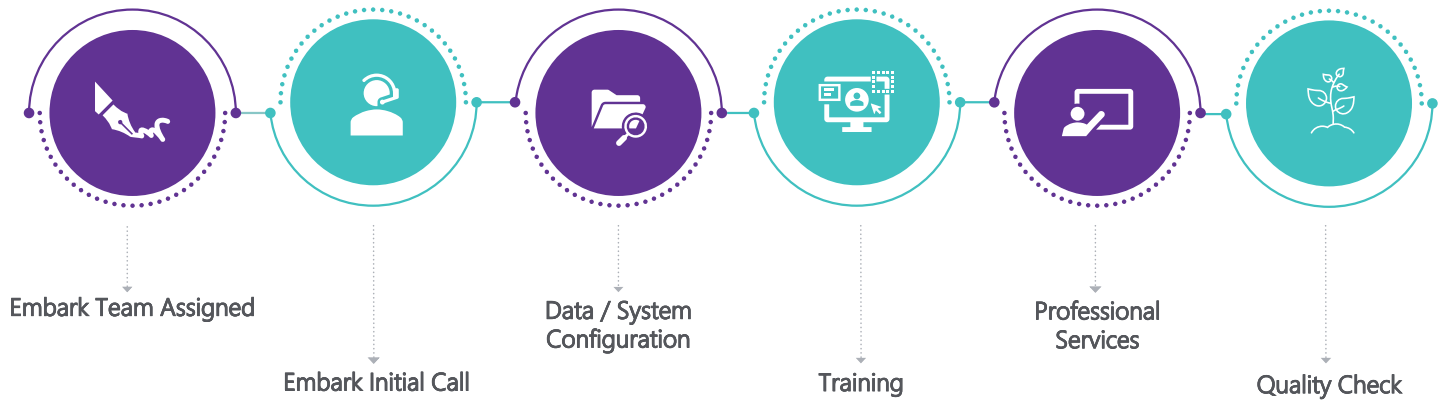

- + A modern system for today's busy schools that need to keep staff and students safe while still welcoming their community in.
- + Built for schools that value simplicity and efficiency with flexibility for staff and visitors.
- + Designed to get the front office staff up and running with a few clicks – removing the need for extensive and hard-to-read manuals and clunky hardware requirements.
